Mr. J. Grahonya,
Plant Manager
Hysan Corporation
3000 W. 139th Street
Blue Island, Illinois 60406

E.S. Berger, Vice President
General Counsel
Hysan Corporation
919 W. 39th Street
Chicago, Illinois 60609

Dear Mr. Grahonya:

An inspection of the above facility was conducted by a representative of the Illinois Environmental Protection Agency (IEPA) on March 24, 1982. This inspection was conducted by the Illinois Environmental Protection Agency under a Cooperative Arrangement with, and authorization of, the United States Environmental Protection Agency (USEPA). A copy of the inspection report is enclosed. The purpose of the inspection was to determine your facility's compliance status with the Resource Conservation and Recovery Act (RCRA) of 1976, P.L. 94-580, as amended. Based on the information obtained during the inspection we have determined that the above facility is exempt from RCRA.

Therefore since your facility is not regulated under RCRA, we recommend that you submit a letter to US EPA Region V, RCRA Activities, Post Office Box 7861, Chicago, Illinois 60680, requesting that your EPA Form 8700-12 Notification of Hazardous Activity be withdrawn. Copies of this letter should also be sent to US EPA, Enforcement Division, Attention: Water and Hazardous Materials Compliance Section, 230 South Dearborn Street, Chicago, Illinois 60604, and to the Illinois EPA, at the above address.

Your cooperation and efforts in this matter are appreciated. Should you have any questions about the report or letter, please contact Bonnie Eleder at the above number.

Sincerely,

Kenneth P. Bechely, Northern Region Manager
Field Operations Section
Division of Land Pollution Control

On the above date an ISS inspection was done. This facility is involved in the formulation of chemical specialties, such as soaps, detergents, disinfectants, cleaners, + polishes. They notified as a generator + a storage facility-501. The inspection revealed, though, that they have not in the past nor do they now generate ^{any} hazardous waste. Their reason for notifying was for future possibilities in the event that there is a product change which would result in haz. waste generation. The facility will be de-notifying.
